

Welcome to the New Jersey DSRIP Learning Collaborative (LC)

Break-out Sessions

March 10, 2016
2:00 PM – 4:00 PM

New Jersey Department of Health (NJDOH)

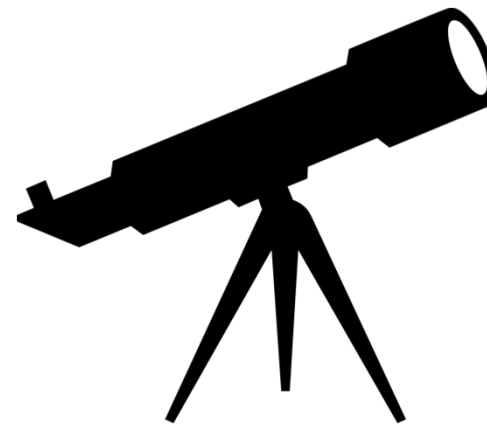

Objectives

- Who are we seeking to improve care for?
 - Who is our patient?
 - What impacts the care of patients?
- How can more available data and information help improve patient care?
 - How can providers have this information at hand to inform treatment?
 - Who has the data – who needs the data – how do we share the data?

What lens are you looking through to identify your patient?

VS

How far is your provider's reach?

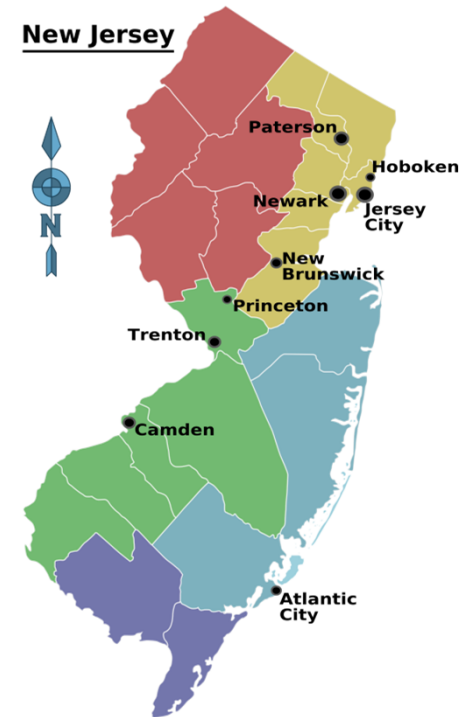

VS

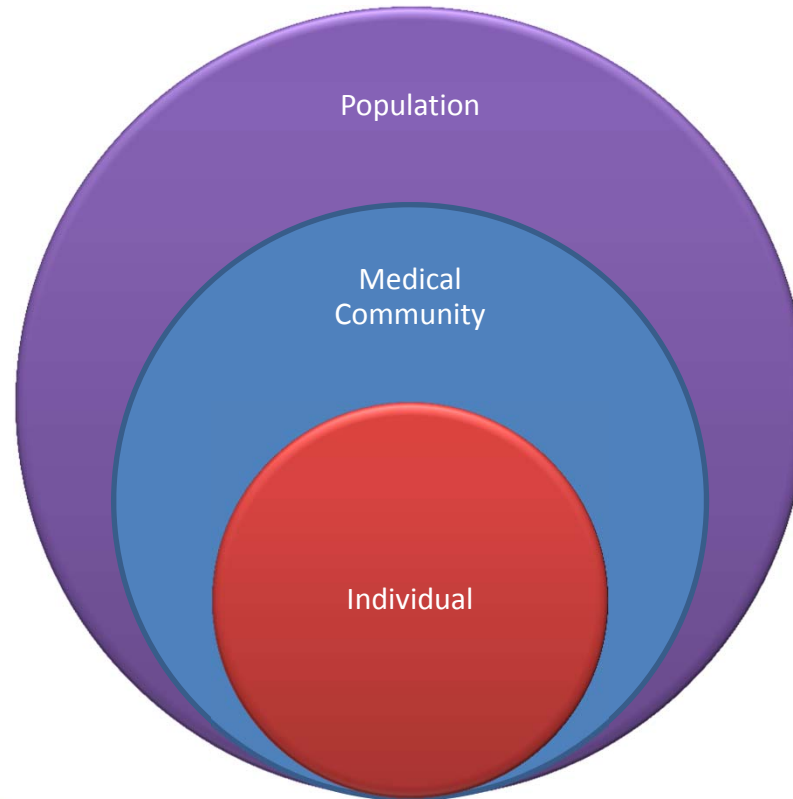

Attribution file

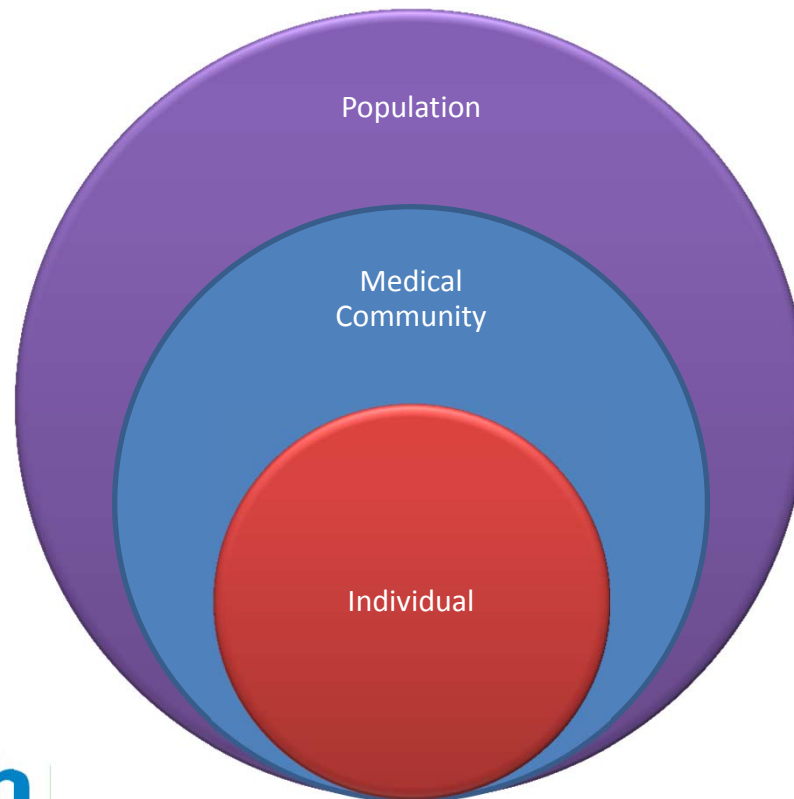

VS

What level is your provider currently operating within?

What needs to happen to support your provider's movement to the next level?

What level of data exchange do you have?

- Directed Exchange
- Query-based Exchange
- Consumer-Mediated Exchange
- ADT alert/ messaging
- Real-time information

What has been your experience with a Health Information Organization (HIO)?

- Successes?
- Challenges?
- What level of data exchange do you have?

HOSPITAL	HIE	FOCUS	COUNTY

CAPITAL HEALTH MEDICAL CENTER HOPEWELL	Trenton Health Team	Obesity	Mercer
ST. FRANCIS MEDICAL CENTER	Trenton Health Team	Diabetes	Mercer
CAPITAL HEALTH REGIONAL MEDICAL CENTER	Trenton Health Team	Chemical Addiction/Substance Abuse	Mercer

OPEN DISCUSSION

Take Away - If you are considering the next step for HIO, talk with service providers in your region.

You should leave the conversation with a solid understanding of the following:

- Economics and sustainability of the HIE
- Internal requirements of participating in the HIE
- Technology behind the HIE and which forms of exchange the HIE supports
- Non-economic benefits of the HIE (in-direct return on investment)
- Risks and liabilities involved with joining the HIE

Below are sample questions to ask:

- Do you have HIE capabilities within your EHR?
- What privacy and security features does your product currently provide and support?
- What form(s) of exchange does your EHR support?
- What are the costs associated with upgrading to include HIE within our practice's EHR?
- What are the maintenance and monthly costs of including HIE within our practice's EHR?
- If you do not currently have HIE functionality, do you plan to integrate HIE into your EHR at some point?
- If so, what is the timeframe for when HIE will be available?
