Survey Review: April- June 2015 Program Enrollment

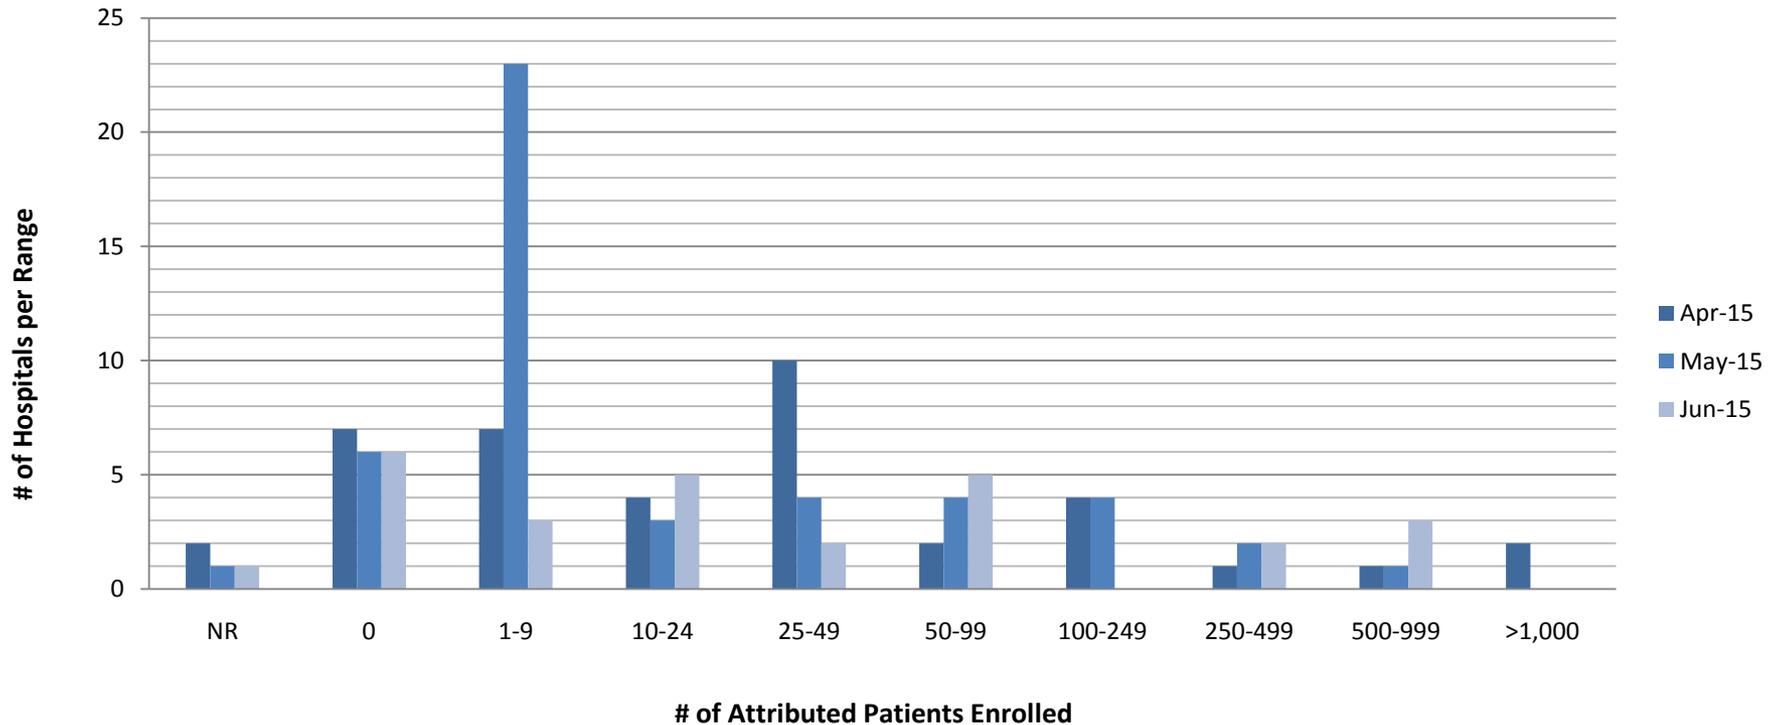

➤ Section IV: Project Implementation- *Observations*

- Total enrolled for April: 5,132
 - First month the enrollment question for attributed patients was asked on the LC survey
- Total enrolled for May: 1,197
 - Difference from previous month most likely due to better understanding of entry request by hospitals, will continue to trend
 - Reinforced survey reporting expectation during the June LC meeting
- Total enrolled for June: 3,313
 - One hospital did not complete the survey and one hospital did not have the data available to report- 47 out of 49 hospitals reported
 - Capture is by attributed population enrollment only
 - Noted on multiple surveys that overall program enrollment for all payor sources is proving successful, however capturing the targeted attributed population patients within the project scope still have low volumes

Survey Review: April- June 2015 DSRIP Program Enrollment

LC 5 Monthly Survey Review: Diabetes & Obesity

- Discussion topics submitted on the May LC Survey
 - ❖ What care coordination tactics prove most helpful in coordinating the care for your patients?
 - ❖ Recruitment and retention of participants within our group visits.
 - ❖ How to improve performance on low performing measures, particularly foot and eye exams for diabetic patients.
 - ❖ How to incorporate attributed population within the project?
 - ❖ Very interested in Motivational interview techniques -we use the Champion Board for positive reinforcement in Diabetes Education what are other DSRIP team members doing?
