Welcome to the New Jersey DSRIP Learning Collaborative

October 08, 2015

New Jersey Department of Health (NJDOH)

STATE OF NEW JERSEY

DEPARTMENT OF HEALTH

The mission of the Department of Health is to improve health through leadership and innovation.

Objectives

Review DSRIP Program Updates

- Improvement Target Goals
- Chart/ EHR Submission
 - Due October 30, 2015
- Web-based DY4 Q2 Progress Report
 - Due October 30, 2015
- Measure Results Updates
- Review of September Learning Collaborative Survey Results

STATE OF NEW JERSEY

DEPARTMENT OF HEALTH

The mission of the Department of Health is to improve health through leadership and innovation.

November Learning Collaborative

November's Learning Collaborative will be an open forum of questions about the approval for the ITGs. The time will be determined and an email will be forthcoming.

STATE OF NEW JERSEY

DEPARTMENT OF HEALTH

The mission of the Department of Health is to improve health through leadership and innovation.

Improvement Target Goals (ITGs)

- Stage 3 Improvement target goals have been approved by CMS.
- A webinar will be held in the coming weeks to review the ITGs with the hospital industry.

Chart/ EHR Submission

- Semi-annual Chart/ EHR measure results for the October 2015 reporting period will use January 1 – June 30, 2015 performance period.

STATE OF NEW JERSEY DEPARTMENT OF HEALTH

The mission of the Department of Health is to improve health through leadership and innovation.

Chart/EHR Submission

- Download Standard Reporting Workbook template from NJ DSRIP website.
 - Only the semi-annual measures associated with your hospital's project will be included along with universal measures.
 - Once completed, submit workbook through the website.

The screenshot shows the NJ DSRIP website interface. At the top, it displays the Governor's name (CHRISTIE and GUADAGNO) and navigation links for Home, Services A to Z, Departments/Agencies, and FAQs. The main header includes the State of New Jersey Department of Health logo and a 'Logout' button. Below the header is a navigation menu with links for DOH Home, DSRIP Home, DSRIP Hospitals, Learning Collaborative, Resources, DSRIP Program Management, and Contact Us. The main content area is titled 'Delivery System Reform Incentive Payment' and contains introductory text about the program. A dropdown menu is open, showing options: Performance Measurement, Project Management, Administration, Change Password, MMIS Measure Acknowledgement, Measure Results, and Chart/EHR Submission. The 'Chart/EHR Submission' option is highlighted with a red box, and a red arrow points to the dropdown menu.

Web-based DY4 Q2 Progress Report

- The DY4 Q2 Progress Report will be available for hospitals to access via the NJ DSRIP website <https://dsrip.nj.gov/> by accessing the Login button.
- Once logged on, the DY4 Q2 progress report is located under the DSRIP Program Management>Project Management tab.
- A guidance document and user guide will also be released.

The screenshot shows the NJ DSRIP website interface. At the top right, it displays "GOVERNOR CHRIS CHRISTIE • LT. GOVERNOR KIM GUADAGNO" and navigation links for "NJ Home", "Services A to Z", "Departments/Agencies", and "FAQs". The main header includes the State of New Jersey Department of Health logo and a "Logout" button. Below the header is a navigation menu with links for "DOH Home", "DSRIP Home", "DSRIP Hospitals", "Learning Collaborative", "Resources", "DSRIP Program Management", and "Contact Us". The main content area features a heading "Delivery System Reform Incentive Pay" with a red arrow pointing to a dropdown menu. The dropdown menu includes options for "Performance Measurement", "Project Management", "Administration", and "Change Password". The "Project Management" option is expanded, showing a sub-menu with "Progress Report" (highlighted with a red box) and "DY4 Reapplication Process". The page content below the heading describes the DSRIP program as a component of the Medicaid Waiver, aimed at improving care and lowering costs through health improvement goals.

STATE OF NEW JERSEY

DEPARTMENT OF HEALTH

Web-based DY4 Q2 Progress Report

- Web-based Progress Report User Guide was sent to the industry this week
- The Stage 1 and 2 Progress Report Guidance Document is available on the NJ DSRIP website for your reference
- The web-based progress report will look and function very similar to the DY4 Reapplication
- Web based Progress Report Improvements and Updates:
 - All text boxes will have a 1500 character limit
 - All text boxes will display how many characters are available to type
 - Users will be able to save progress report, then log back in and resume working on their progress report from the location last saved
 - Any designated user for the hospital will be able to log into the website and see the saved responses and files
 - Maximum size of attached files is 50 MB

Measure Results Update

- The measure results page will be updated in coordination with the rollout of improvement target goals.
- The update will include graphical views of Stage 3, Stage 4, and UPP measure results.

The information below represents MMS and Chart/EHR measure results for your review. To view the measures associated with a section, please click the plus (+) sign to expand the group. Expected Improvement Target Goals (EITGs) associated with Pay for Performance (P4P) measures will be calculated from Improvement Target Goals (ITGs) which were selected by the Quality and Measures Committee (QMC) and are pending approval by CMS. Once approved, EITGs will be displayed on this site. Pay for Reporting (P4R) measures display the median value of data collected from project or DSRIP participating hospitals to provide context to the results. This is provided for informational purposes only.

September Survey Review: Section IV- Observations

Suggestions to Overcome Barrier(s)

- We are in the process of setting up an account at our outpatient diagnostic center for DSRIP patients to receive free services such as blood work and EKGs. *Hackensack University Medical Center*
- The team has developed a new 30-day readmission assessment tool to collect more detailed information on the multiple medical, social and economic factors that can precipitate a readmission. In the past, the team completed readmission reviews retrospectively, however this new readmission assessment is designed to be completed at the point the patient enters the Emergency department. - Identifying the impact of these factors in the patient population that we see will provide us with the data we need to use in better focusing our intervention strategies. *Newark Beth Israel Medical Center*

Notable Success

- Approximately 147 patients have been visited and introduced to the Heart Failure program in either the ED or observation unit by our Clinical Care coordinator. This is a major increase from the 6 initial ED interactions during the previous quarter. The Emergency department has also begun to fax over all referrals of patients who present to the ED with a diagnosis of heart failure for the scheduling of an appointment within 7 days of the ED/ Observation visit. *University Hospital*

September Survey Review: Section IV- Observations

Notable Success- Continued

- We have implemented a "meds to bed" program to assist patients who have no resources to purchase their medications. To date, 2 patients were provided with this service and received their prescribed medications either 30 day or 90 supply free of charge; paid for by the hospital. A total of 14 scales were provided to patients in order for them to conduct self daily weights. We recently acquired "bus tickets" to give out in the future to patients needing transportation to MD office. *Raritan Bay Medical Center*

Lesson(s) Learned/Best practice(s)

- Prior to discharge from the hospital, our pharmacist calls the patient's pharmacy to ensure that they received faxed prescriptions or prescriptions sent through e-prescribe. At times, the pharmacies can miss prescriptions and patients do not always remember that they have to pick up or coordinate delivery of their medications. This process ensures that patients get their medications, timely, post discharge, thereby decreasing readmissions. *East Orange General Hospital*
- Ensure all discharge requirements are met (meds, appt, etc) before discharge. *Bayonne Medical Center, CarePoint Health– Christ Hospital, Hoboken University Medical Center*
