

NJ DSRIP February Webinar Q&A Transcript

February 11, 2020

Please submit any additional or clarifying questions to njdsrip@pcgus.com.

| Question | Answer |
|--|---|
| SRWs and MVTs | |
| The SRW denominator and the number of MVT records may not match if the patient was excluded for the measure, correct? | Yes. If patients are initially on the MVT but are ultimately excluded from the denominator criteria then the number of MVT records will not match the SRW denominator total. Please indicate on the MVT those who are excluded by checking the “Eligible for Denominator but Excluded” column. If we tally the number of records on your MVT that do not have this column checked, it should match the SRW denominator total. |
| Is the “initial patient total” section where we would account for the true total number of patients on the MVT if some were later excluded from the denominator? | Yes, that is correct. |
| Just to clarify from Slide #22, if a patient is on a hospital's attribution roster, should they be included in a metric with an eligible visit if they meet the criteria for a given metric? | Yes. If the patient is on the hospital’s roster and they meet the criteria for denominator inclusion with an eligible visit, they should be included in the metric. |
| QIP NJ | |
| When can we hear more about the QIP NJ program? | We will share details on the QIP NJ program as soon as they are available. |
| Progress Reports | |
| Will you be providing guidance documents for the Progress Report and budget due April 30th? When will they be available? | Yes, we will provide the DY8 Semi-Annual Progress Report guidance document, template, and budget template as usual. We expect to share these materials with hospitals in early March 2020. Hospitals will be informed when they are available, and the materials will be posted to the NJ DSRIP Participants webpage . |
| Can those materials be released earlier? | We will release the materials as soon as possible. Since we do not anticipate major changes from the last semi-annual period, hospitals can use previous report guidance as a reference. |
| What is the time period for the Progress Report due April 30th? | The DY8 Semi-Annual 2 Progress Report due on April 30 th , 2020 should reflect work completed by the hospital from October 1, 2019 - March 31, 2020. |
